

METAL BUILDING SOLUTIONS **HANGAR BUILDINGS**

IT'S PRIME TIME

When you need more than a metal building, you need Prime. Prime Metal Buildings & Components is the leading designer and supplier of innovative metal buildings.

WWW.PRIMEBLDG.COM

Durable and versatile.

Prime Metal Buildings give you the strength and clear span capabilities you need for durable, functional aircraft hangars. Our pre-engineered steel framing systems allow for clear spans that can reach over 250' wide. Multiple door systems, residential areas, as well as mezzanines, office space, galleries, and maintenance areas can all easily be incorporated into your custom design. All Prime Metal buildings are manufactured right here in the USA.

Our Process

Collaborate: First, we listen and learn about your project and your vision. Then our team will assess your needs and make suggestions based on our experiences. We will work with you to make sure that you get the metal building you need.

Design: We use state-of-the-art technology to create preliminary drawings that you can use to visualize your new building.

Estimate: Our team of estimators will evaluate your project's design, timeline, and budget to provide you with a detailed quote. With our history of delivering both small and large projects on time and on budget, you can rest assured that we have taken every detail into consideration when formulating your quote.

Commit: Once an agreement has been reached, it's time to sign the paperwork and get started! We'll communicate key production and delivery dates, so you know exactly what to expect.

Manufacture: Our in-house production capabilities allow us to manufacture everything that goes into a metal building including primary framing, secondary framing, sheets, and trim.

Support: We're with you from start to finish, and we mean it. Once your building is delivered, we provide support throughout the entire erection process.
